

TRAINING SESSION

# HOW TO CAST: MERSIVE SOLSTICE

---

This training aims to provide faculty, staff, and students with a complete understanding of how to cast their screen using the Mersive pods, located around campus in multipurpose spaces such as lecture halls and large venues.

- 
- Casting: The act of transferring the display from one device to another, either through a wired connection or wirelessly.

- Supported operating systems include: Windows, Mac, iOS, and Android.

- 
- Miracast: The built in function for wireless casting with **Windows** devices.

- 
- Airplay / Screen Mirroring: The built in function for wireless casting with **Apple** devices.

- Mersive pod: A device that is connected to the television/projector that allows for wireless casting.

- also has video conferencing capabilities
- no video conferencing capabilities / casting only

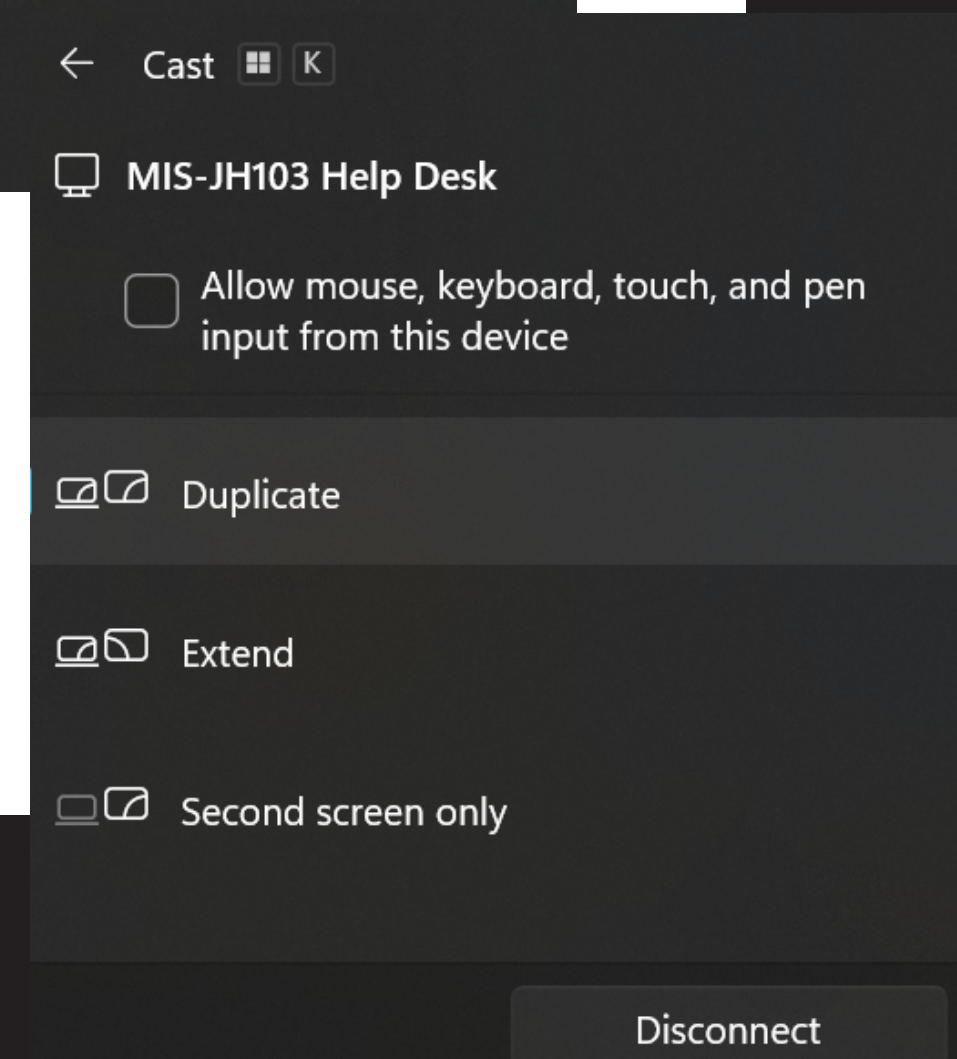

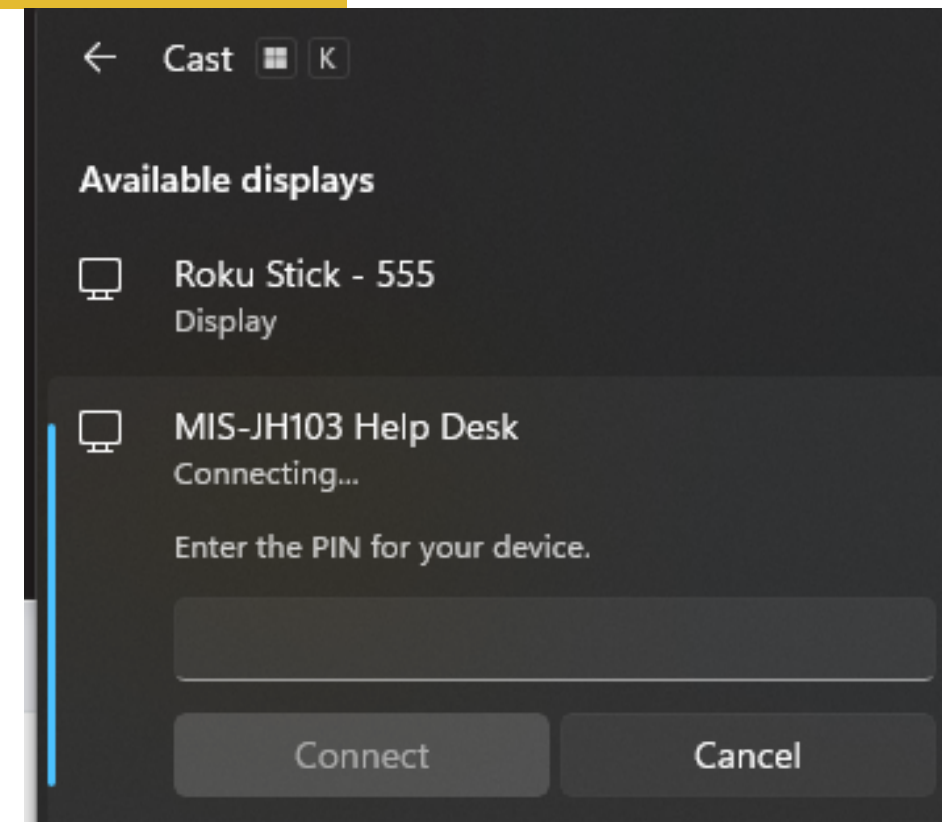

- 
- 
- Windows devices can use Miracast without the Mersive app by using Windows + K.
  - MacOS will only use the desktop app or URL in a browser.
  - iOS devices can use Airplay as long as the app is installed.
  - Android devices will use the Mersive app to cast.

- Pfeiffer managed laptops and iPads: Contact techsupport@pfeiffer.edu and we will remotely push the app to your laptop.
- Personal laptops: Go to the following website link to install.  
<https://www.mersive.com/download/>
- Mobile devices: Download the Mersive Solstice app from the App Store or Google Play Store. You may also scan the QR code.

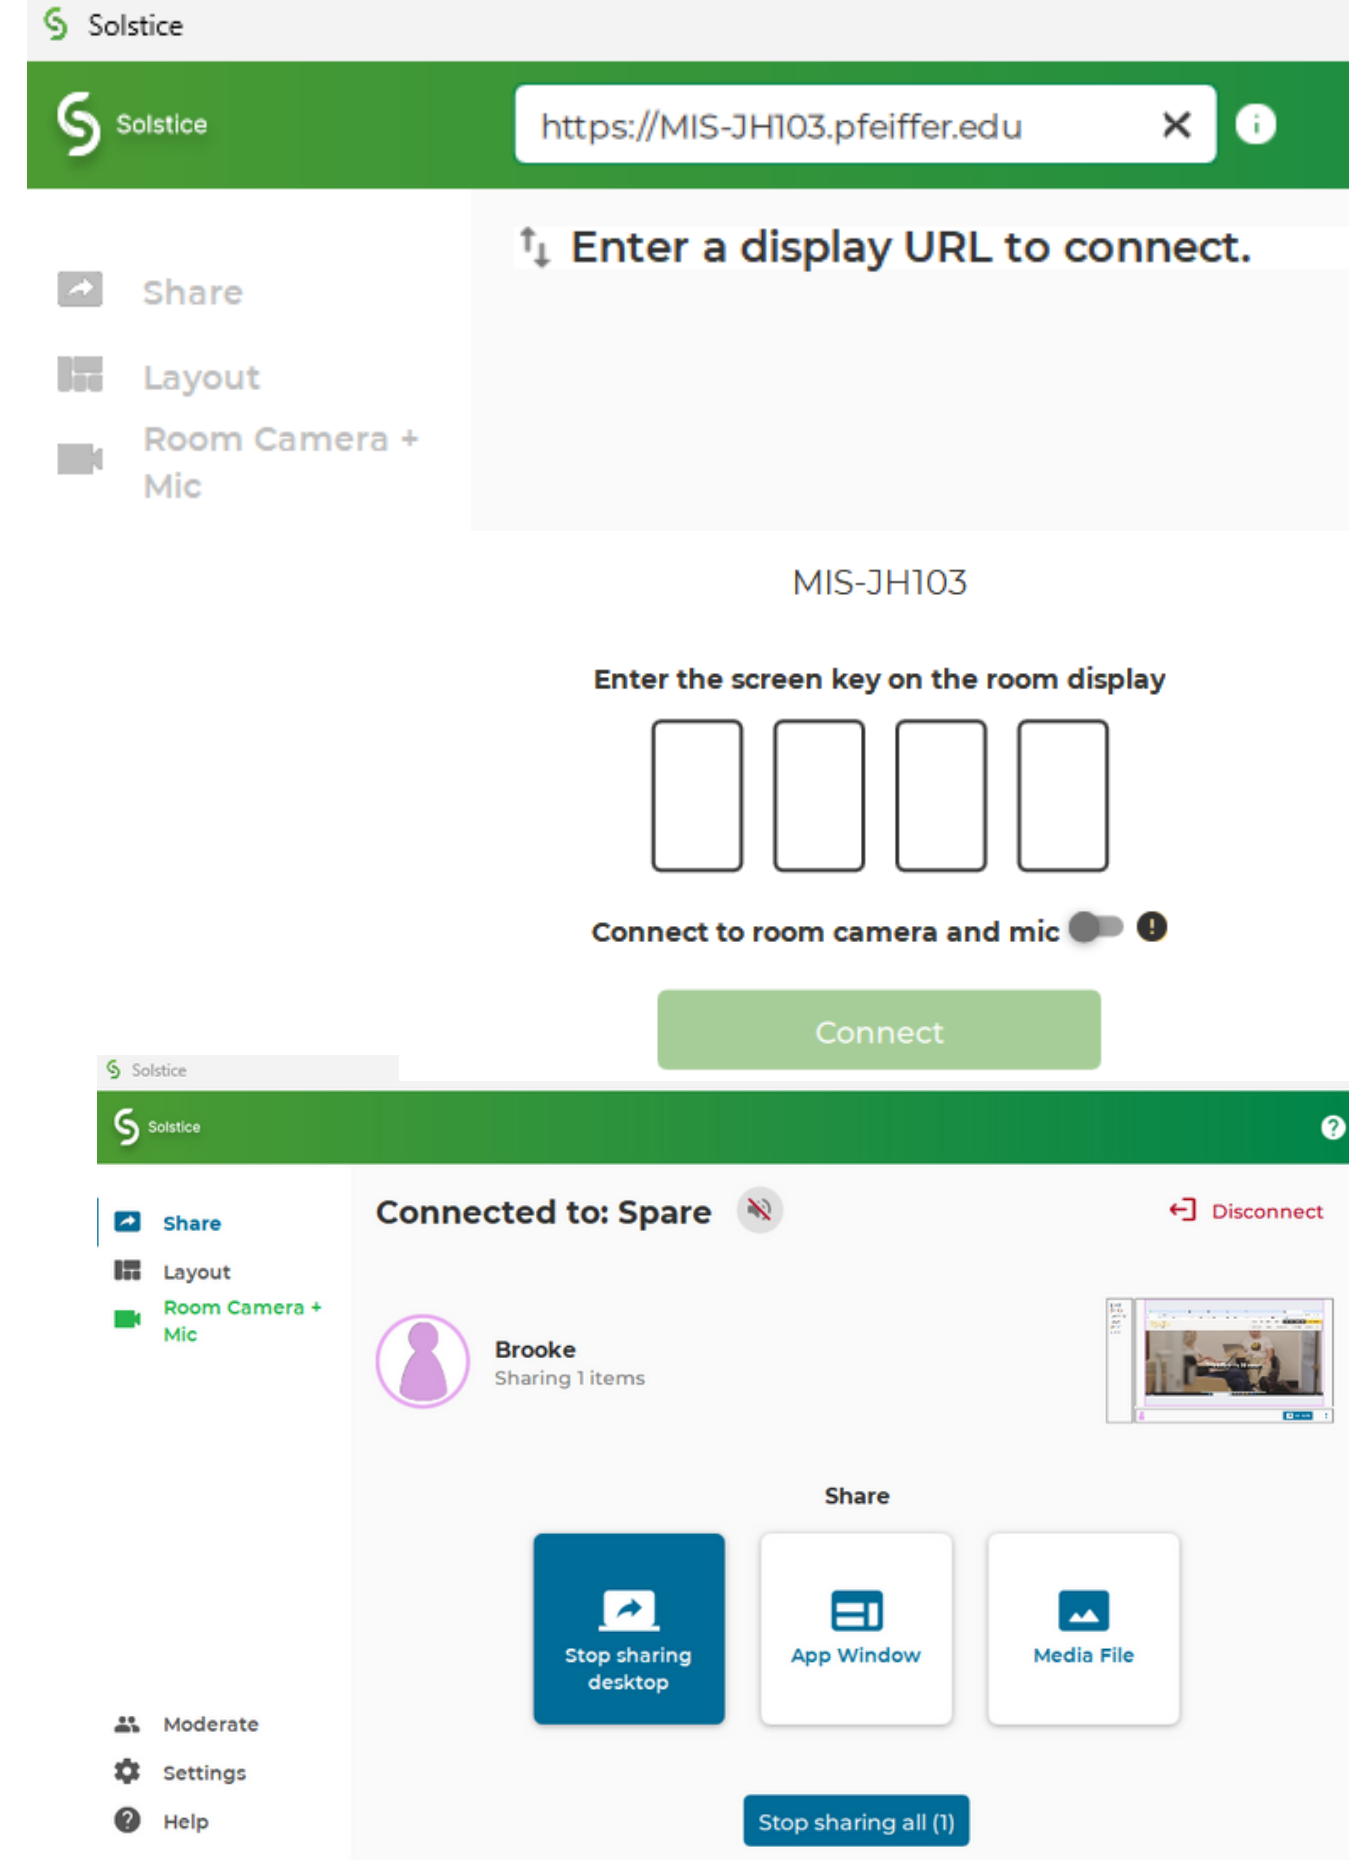

Scan QR code to  
download mobile app

- Click Windows + K on your keyboard.
- Click on the available display that corresponds to the room number.
- Enter the PIN that appears on the screen.
- After connecting, the Miracast menu should provide options to change the display settings. If it does not, you should be able to click 'Change projection mode' or click Windows + P to bring them up.
- Click Disconnect when you are done casting.

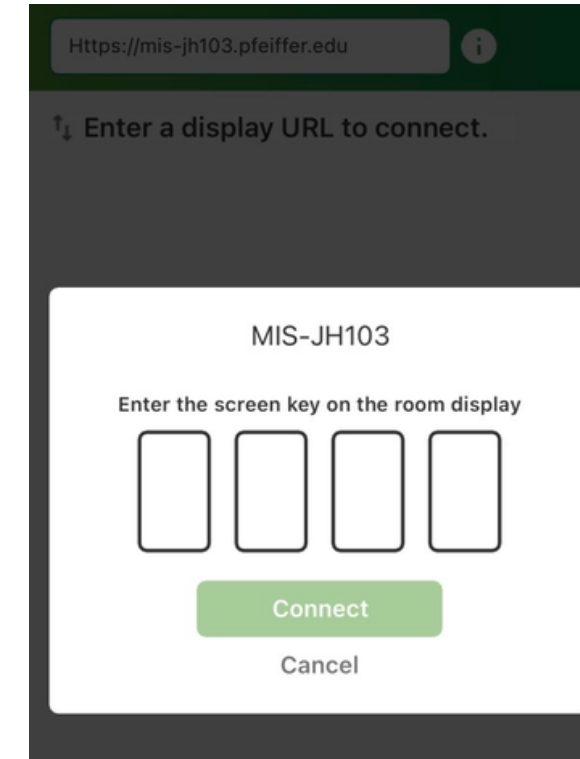

- Type the Room's Full Name shown on the screen into the top search bar and hit Enter.
  - Example: (<https://MIS-JH103.pfeiffer.edu>)
- Type in the 4 digit code that will display on the screen.
- Click Connect.
- Click Share Desktop to share your laptop screen.
- When you are done, click Stop sharing desktop and Disconnect.

# 1.

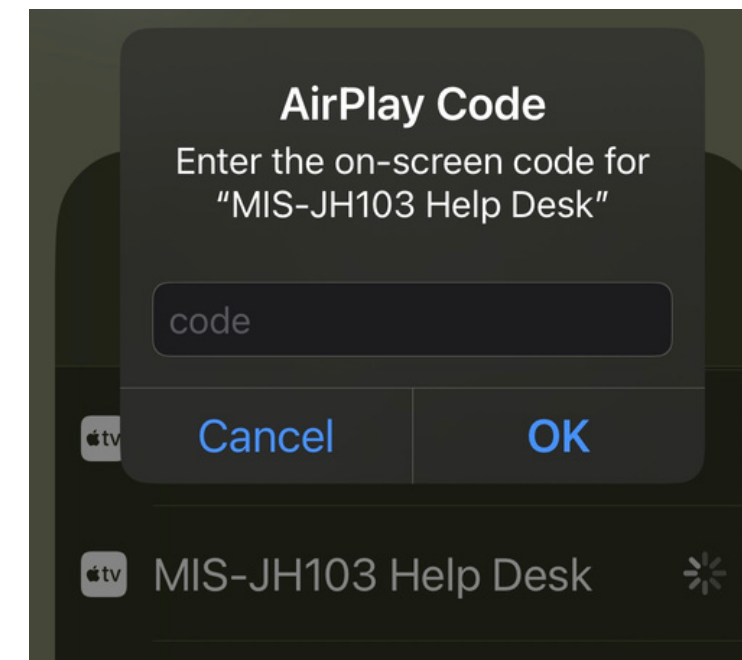

- Open the Mersive app on your iPhone or iPad.
- Type the Room's Full Name shown on the screen and hit enter.
  - Ex: (<https://MIS-JH103.pfeiffer.edu>)
- Enter the 4 digit code and click Connect.
- Navigate to Airplay, click on the corresponding room name, enter the 4 digit code, and click OK.
- Click Stop Mirroring when finished and then Disconnect on the app.

# 2.

# 3.

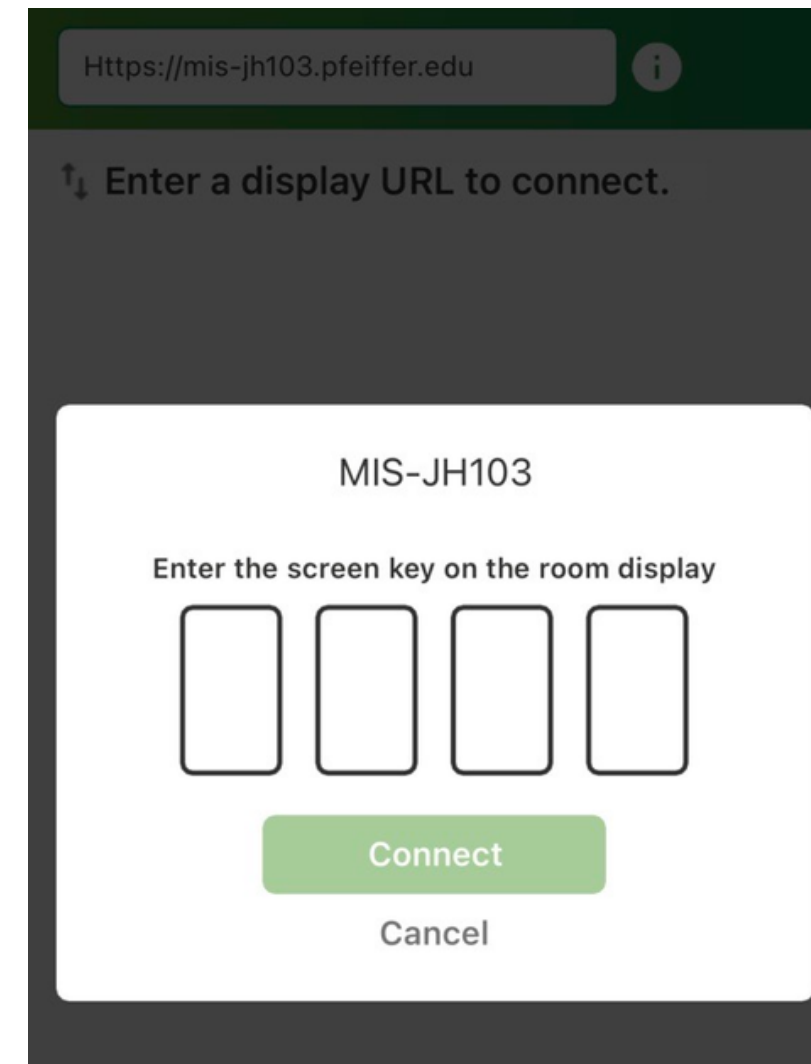

# 4.

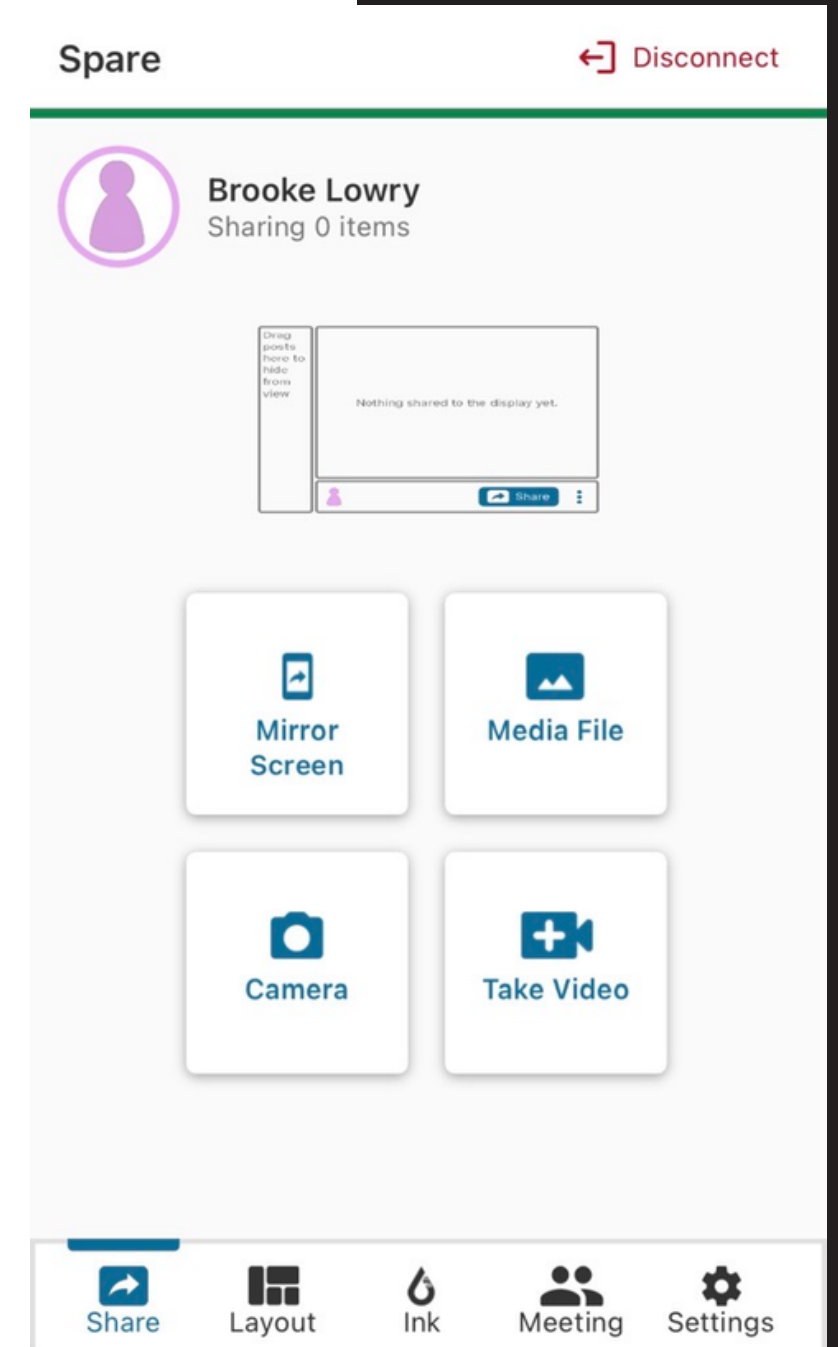

- Open the Mersive app on your device.
- Type the Room's Full Name shown on the screen and hit enter.
  - Ex: (https://MIS-JH103.pfeiffer.edu)
- Enter the 4 digit code and click Connect.
- Click Mirror Screen.
- When done, click Disconnect.

1.

The screenshot shows the Mersive app interface. At the top, there is a URL bar with "https://mis-jh103.pfeiffer.edu". Below it, a prompt says "Enter a display URL to connect." A modal dialog is open with the title "MIS-JH103". Inside the dialog, it says "Enter the screen key on the room display" and shows four empty input boxes. Below the boxes are two buttons: "Connect" (green) and "Cancel".

2.

- Open Web Browser and type the Room's Full Name shown on screen into the address bar and Enter.
  - Example: (https://MIS-JH103.pfeiffer.edu)
- Click Share my Screen.
- Enter the 4 digit code, type your name, and click Launch!
- Click 'Stop sharing' and close the browser tab when you are done.
